
The FUSE program requires all students to meet degree requirements at the University of South Florida and the corresponding partner institution which grants the Associate of Arts degree.

General information

The FUSE program requires students to meet regularly and frequently with academic advisors to ensure program success.

Some programs at USF will require an additional application to the specific college in addition to the general USF application. If requirements and deadlines are met, the student will still have the guaranteed admission to USF and the major that FUSE promises. Check individual grad paths for deadlines and any other additional requirements.
